### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brian K. Dutton on 10/17/05.

The application has been amended as follows:

Claim 1, line 3 after "mounted on a" insert --run-flat--

Claim 6, line 2 after "a" before "support core member" insert --run-flat--

and line 3, after "antenna" insert --of the tire monitoring device--

2. The following is an examiner's statement of reasons for allowance: The present invention is directed to a run-flat tire. Each independent claim identifies the uniquely distinct features "a support core member in the cavity of a tire and a tire monitoring device includes a transmission antenna which disposed *on* a support core member surface" in combination with the manner claimed. The closest prior art, Karbo et al. [US 4,160,234] discloses a tire monitoring transmission antenna which molded integrally with the support core member, however, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
